# ASCENT Biostatistics Learning Network (ABLN)

Reimagining Statistical Innovation in Serious Illness Research

ASCENT
Advancing the Science of Palliative Care Across the Lifespan

## What We Do

- Advance cutting-edge statistical methods in palliative care research
- Address real-world analytic challenges emerging from ASCENT projects
- Launch knowledge generation initiatives in high-impact methodological areas
- Mentor junior biostatisticians and trainees
- Foster collaboration across ASCENT Cores
- Generate scholarship and methodological publications

## Potential Focus Areas

- Truncation due to death in serious illness research
- Clustering in pragmatic palliative care trials
- SMART designs and adaptive interventions
- Dyadic and triadic patient-caregiver analyses
- Data Coordinating Center models

## Quarterly Topic:

Methods for Handling Informative Missingness in Palliative Care Research

**Tuesday, September 8**
**12:00–1:30 PM ET**

Click here to register

## Who Should Join:

- Biostatistics faculty (junior or senior)
- Methodologists
- PhD students
- ASCENT Core investigators
- Collaborators interested in advancing statistical science in serious illness research
